

— FOUND BY AI

Ask ChatGPT who's best at what you do. Are you on the list?

How AI assistants pick who to recommend.

45%

of U.S. consumers used AI to get a **local business recommendation last year.**

Your next buyer may never see a page of links.

Source: BrightLocal, Local Consumer Review Survey 2026

01

It has to **understand** **what you do.**

One clear sentence on your homepage: what you sell, who it's for, where you work.

02

It trusts **what others say** **about you.**

Reviews, listings and mentions on other sites.
Same name, address and offer everywhere.

03

It quotes pages that answer questions.

Prices, timelines, who it's for, what's included.
Write down what buyers ask you on the phone.

04

It reads your structured data.

Schema markup tells machines your name, services, prices and reviews in plain labels.

05

It skips pages that **won't load.**

Slow, heavy pages are harder to read. Fast, clean pages get read and quoted.

— SAVE THIS

You can't force an AI to **pick you.**

- ✓ But you can make it easy to understand you
- ✓ Easy to trust you
- ✓ Easy to quote you
